

Plugins You Want & Need

When building your website, we recommend that you have at least these starter plugins:

- ✓ **All-In-One SEO Pack**: Helps you by automatically optimizing your site/blog, making it easier for Search Engines, such as Google, to locate you.
- ✓ **Google Analytics for WordPress**: Easily track the movements of your site visitors, to see which pages are most viewed and for how long; following the progress of your site/blog.
- ✓ **Google XML Sitemaps**: This plugin will generate a special XML sitemap which will help search engines like Google, Bing, Yahoo and Ask.com to better index your blog.
- ✓ **Shareaholic**: Shareaholic has proven time and time again to be an extremely useful and successful tool in getting your readers to actually discover and share your content over many other social media platforms.
- ✓ **W3 Total Cache**: W3 Total Cache improves the user experience of your site by increasing server performance and reducing the download times.
- ✓ **Akismet**: Akismet checks your comments against the Akismet web service to see if they look like spam or not and lets you review the spam it catches, to verify that it truly is.
- ✓ **WordPress Database Backup**: WP-DB-Backup allows you easily to back up your core WordPress database tables. You may also backup other tables in the same database.
